

Easy-Spray[®] KSU

Spray weeds while you sweep!

'The Safest and Most Effective Weed Control'

- Ideal for overall spray programmes but especially to achieve higher standards (e.g. for Britain in Bloom) to complement existing weed control programmes, as a 'spot' tidy up operation between main applications of herbicide.
- The herbicide is applied by automatically calibrated Controlled Droplet Application (CDA).
- With the EASY-SPRAY[®] unit from Amenity Land Solutions, there is very low risk of environmental hazards such as spray drift and over-dosing.
- Public attention is not drawn to the spraying operation, as sweeping is usually taking place at the same time.
- Bayer Environmental Science herbicide CDA Vanquish Biactive used in the KSU is Non-irritant and environmentally the safest available under COSHH regulations.

Easy-Spray® KSU

Benefits of the Easy Spray KSU Sprayer System

- Can be fitted to all commercial sweepers and utility vehicles.
- Computer programmed – Automatically Calibrated
- The unique spray head is totally sealed and protects against extreme moisture, salt and dirt.
- Auto Self-Cleaning.
- Vehicle dashboard lockable control panel for easy & safe operator use.
- Simple on/ off push button operation.
- Variable swath width and forward speed to suit user.
- Fully Adjustable spray arm folds away when not in use.
- Stainless steel box with two lockable hasps.
- Chemical reverse facility. Saves chemical and washing contamination.
- Modular construction simplifies servicing and repairs.

Note: ALS can offer operator training and certification on request.
