Lawn Sand

Contains: 3-0-0 +3%Fe +1%MgO Treats: 571-190m²

A premium lawn sand designed to assist grass plants in outcompeting weeds and moss. Formulated to offer consistent growth and colour response in spring and summer across all sports and amenity turf, including formal and utility lawns.

Containing four plant essential nutrients to promote healthy grass plants and turf areas throughout the growing season.

Ammonium nitrogen - for cell division leading to growth of leaves, shoots and roots as well as chlorophyll, vitamins and amino acid production.

Sulphur - for the active metabolisation of nitrogen, formation of amino acids, enzymes and chlorophyll production.

Magnesium oxide - for chlorophyll and amino acid production leading to optimised photosynthesis as well as better uptake and utilisation of iron.

Iron - for the synthesis of chlorophyll and correct mitochondrial function in the electron transport chain. Leading to activation of a wide range of plant biological function such as enzyme activation and respiration.

Application:

Use	Rate
Standard application rate	34–75g/m ²
*Higher application rate	75–105g/m ²

Ingredient	Oxide value	Elemental value
Total nitrogen (N)		3.0%
Ammoniacal nitrogen (N)		3.0%
Phosphorus pentoxide (P₂O₅)	0.0%	0.0% P
Potassium oxide (K₂O)	0.0%	0.0% K
Magnesium oxide (MgO)	1.0%	0.6% Mg
Sulphur trioxide (SO ₃)	13.3%	5.3% S
Iron (Fe)		3.0% Fe

*Warning:

When applied at higher rates may cause detrimental effects to moss populations.

May stain hard standing areas.

Apply evenly, using a suitable calibrated fertiliser spreader, avoid overlapping or missing areas.

Do not apply in hot, dry weather or frosty conditions.

If there is no rain within 2 days of application irrigate the treated area thoroughly.
