

HYSWARD-P

A soluble concentrate containing 92g/l mecoprop-P (8.35% w/w), 16g/l dicamba (1.45% w/w) 101g/l MCPA (9.16% w/w) as the potassium salt. Formulation: Soluble concentrate

For the control of a range of annual and perennial weeds in amenity grassland and managed amenity turf.

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work.

HYSWARD-P is a registered product of Agrichem Limited which is an associated company of Agrichem (International) Limited.

MAPP 17609

DANGER

RISK AND SAFETY INFORMATION

Causes serious eye damage.

Toxic to aquatic life with long lasting effects.

Avoid release to the environment. Wear protective gloves/protective clothing/eye protection/face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or

doctor/physician. Collect spillage. Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste.

To avoid risks to human health and the environment, comply with the instructions for use

IMPORTANT INFORMATION:

FOR USE ONLY AS AN AGRICULTURAL/HORTICULTURAL HERBICIDE as directed:

Crop:

Managed amenity turf and amenity grassland

Max dose

see DIRECTIONS FOR USE

Max No. of treatments

1 per annum

The total amount of mecoprop-P applied to an individual crop, or in a single year in the case of a perennial crop, must not exceed the maximum dose of mecoprop-P approved for application to that crop by any single mecoprop-P containing product. Do not apply by hand held equipment. Extreme care must be taken to avoid spray drift onto plants outside target area.

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

SAFETY PRECAUTIONS

Operator Protection Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment.

WEAR SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the concentrate. **WEAR SUITABLE PROTECTIVE GLOVES** when handling contaminated surfaces.

However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher level of protection.

WASH HANDS AND EXPOSED SKIN before meals and after work. **WHEN USING DO NOT EAT, DRINK OR SMOKE.** **WASH CONCENTRATE** from skin or eyes immediately. **WASH CONCENTRATE** from skin or eyes immediately.

ENVIRONMENTAL PROTECTION

EXTREME CARE MUST BE TAKEN TO AVOID SPRAY DRIFT onto non-crop plants outside of the target area. **DO NOT CONTAMINATE WATER** with the product or its container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

STORAGE AND DISPOSAL

KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDINGSTUFFS. **KEEP OUT OF REACH OF CHILDREN.** **KEEP IN ORIGINAL CONTAINER,** tightly closed, in a safe place. **RINSE CONTAINER THOROUGHLY,** by using an integrated pressure rinsing device or manually rinsing three times. Add washings to sprayer at time of filling and dispose of safely. **DO NOT RE-USE** for any other purpose.

MEDICAL ADVICE

IF YOU FEEL UNWELL, seek medical advice (show label where possible).

HYSWARD P

General Weed control in sports turf, parks, cemeteries, airfields and other amenity grassland.

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

HYSWARD-P may be applied at any time during the season, but ideally spraying should be carried out when the weeds are actively growing and the soil is moist. HYSWARD-P is not so effective under drought conditions. Optimum weed control comes from treatment early in the season, during May but timing should take into account the management practices, the locality and the season.

RESTRICTIONS: AVOID drift onto all broad-leaved plants outside the target area.

Spray drift must be avoided especially near susceptible crops such as tomatoes, lettuce, oilseed rape vegetables, turnips, swedes, sugar beet, peas, glasshouse crops fruit and ornamentals.

Other **RESTRICTIONS** apply. See under **CROP SPECIFIC INFORMATION**

FOLLOWING CROPS:

Do not sow any crop into soil treated with Hysward-P for at least 3 months after application.

RESISTANCE MANAGEMENT:

When herbicides with the same mode of action are used repeatedly over several years in the same field, selection of resistant biotypes can take place. These can propagate and may become dominating. A weed species is considered to be resistant to a herbicide if it survives a correctly applied treatment at the recommended dose. A strategy for preventing and managing such resistance should be adopted. This should include integrating herbicides with a programme of cultural control measures.

Guidelines have been produced by the Weed Resistance Action Group and copies are available from the HGCA. CPA, your distributor, crop adviser or product manufacturer.

CROP SPECIFIC INFORMATION:

Amenity Grassland and Managed Amenity Turf

Timing: Spraying may be carried out any time during the season providing that the weeds have been allowed to grow between mowings. A second treatment with an alternative product may be needed to control particularly heavy infestations, or more resistant weeds.

Dose: Apply up to 6 litres per hectare as an overall spray.

Water Volume & Spray Quality: As an overall spray, in 200-500 litres of water, at a maximum pressure of 2 bars, using a medium quality spray (BCPC definition) to reduce drift. The higher volumes are most appropriate for closely mown swards, or where the weed population is very large or dense.

RESTRICTIONS DO NOT CUT for 24 hours to allow the treatment to be absorbed, and preferably allow 2-3 days. **DO NOT** use on new grass for six months after establishment. **DO NOT USE CUTTINGS** as a mulch, however composted cuttings may be used 6 months after application. **DO NOT** spray on windy days to avoid drift. **AVOID** drift onto all broad-leaved plants outside the target area. **DO NOT SPRAY** when rain is imminent. **DO NOT SPRAY** during drought conditions, or when grass is otherwise under stress, such as following frost.

APPLICATION RATE 5.0L/HA

HYSWARD-P controls the common turf weeds – Dandelion, Buttercup, Plantains, Common mouse ear, White clover, Birdsfoot Trefoil, Common Chickweed and Self Heal at 5.0L/Ha.

APPLICATION RATE 6.0L/HA

The more resistant weeds, including well established perennials such as Daisies, Docks, Creeping thistle, Common Field Speedwell, Mayweed and Nettles benefit from the full dose of 6L/Ha.

The level of kill of individual weeds is related to their stage of growth at the time of treatment. A further treatment with an alternative product may be needed to control particularly heavy infestations or more resistant weeds.

MIXING:

FILLING THE SPRAYER; half fill the spray tank with clean water and start agitation. Add the required quantity of Hysward-P and top up the tank with water.

WASH EQUIPMENT thoroughly with water and a wetting agent or detergent immediately after use. Wash out again with clean water before using another product.

Approval/Authorisation holder:
Agrichem Limited, Arus Hygeia,
Oranmore, Co. Galway Ireland.

COMPANY ADVISORY INFORMATION

This section is not part of the Product label under the Control of Pesticides Regulations 1986.

TERMS AND CONDITIONS OF SUPPLY, SALE OR USE.

The goods supplied by Agrichem (International) Ltd are suitable for the purposes expressly set out in this label when stored, handled, mixed, applied and used in accordance with the instructions on this label. Agrichem (International) Ltd gives no warranty, statutory or otherwise as to the quality or fitness for purpose of the goods other than that expressly set out above. Agrichem (International) Ltd accepts no liability for any injury, loss of life (except where caused by its negligence), damage or direct or indirect or consequential loss (all three of which terms include, without limitation, pure economic loss, loss of profits, loss of business, depletion of goodwill and like loss) howsoever caused arising out of or in connection with the storage, handling, mixing, application or use of goods otherwise than in accordance with these directions. A copy of Agrichem's full set of Terms and Conditions are available on request from Agrichem (International) Ltd.
