TRICO, efficient deer protection

**FORMULATION**

Oil-water emulsion based on sheep fat

STORAGE AND SHELF LIFE

- Store only in the original packing
- Avoid storage temperatures beyond +30°C and below 0°C
- The product is durable in its original sealed container for 2 years
- After opening leftover quantities should be used as soon as possible

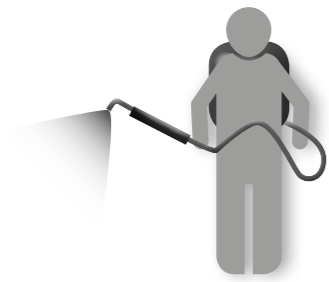

Trico

- Packaging 5L and 10L
- Application areas, forest, grapes/orchards, field crops
- White color allows quick and clear working

Trico Garden

- Packaging 1L and 250ml
- Application areas, home and garden/ornamentals
- No color

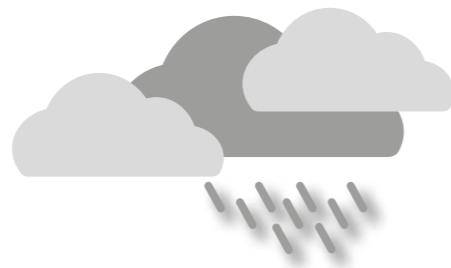

EASY-TO-USE

Easy to use application

TRICO is spray able with common knapsack sprayers. No special equipment is needed and the liquid formulation allows a fast and efficient application. The white marking color inside TRICO helps to visualize the already treated trees, which increases the operating speed.

LONG-LASTING

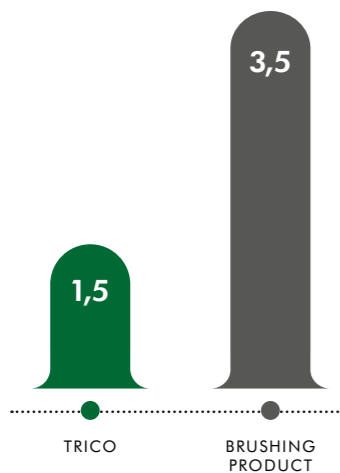

Water resistancy

TRICO has to be sprayed on dry forestry plants, at temperatures above 0°C. Once the product dried on the plant surface it shows excellent rain hardness and has a long lasting effect of up to 6 months. Therefore only one application per season is necessary. (winter/summer browsing)

SAVINGS OF UP TO **50 Euro** PER 1000 PLANTS

Economic benefit due to spraying application

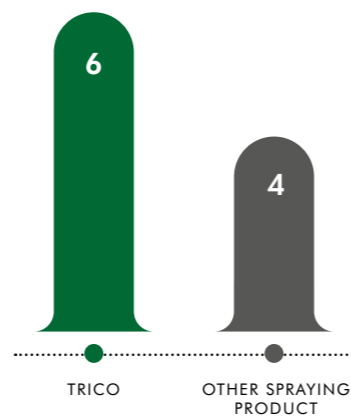

TIME IN HOURS/1.000 PLANTS

BASED ON THE EXPERIENCE OF SELECTED EUROPEAN MARKETS

Economic benefit due to long lasting efficacy

TIME IN MONTHS

What is TRICO?

TRICO is a natural deer repellent, based on the active ingredient of sheep fat, with proven efficacy against deer browsing in forestry, horticulture and open field crops.

Economic Benefits

Economic benefits in terms of cost and time strongly outweigh other repellent methods

Certified quality

Registered in many European countries as a plant protection product

Environment friendly

Natural and environmentally friendly, based on sheep fat; Harmless for humans, animals and beneficials

Double Mode of Action

Strong and proven efficacy due to double mode of action: odor- and taste-based effect

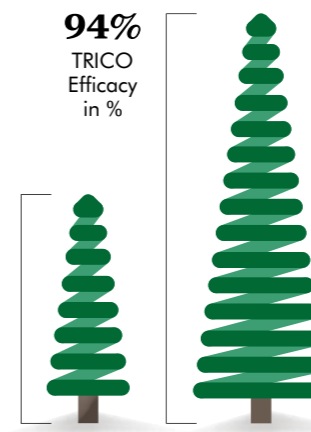

Quality control parameters

Our ISO certified QC-lab is testing every product batch of the raw material and the ready formulation for microbial contaminations. The raw material is regularly tested on the compounding of the fatty acids.
